

AquaBounty appoints Sylvia Wulf as Chief Executive Officer

November 28, 2018

MAYNARD, Mass., Nov. 28, 2018 (GLOBE NEWSWIRE) -- AquaBounty Technologies, Inc. (NASDAQ: AQB) ("AquaBounty" or the "Company"), a biotechnology company focused on enhancing productivity in the aquaculture market and a majority-owned subsidiary of Intrexon Corporation (NASDAQ: XON), is pleased to announce the appointment of Sylvia Wulf as Chief Executive Officer and Executive Director effective on January 1, 2019.

Sylvia Wulf joins AquaBounty from US Foods, Inc., one of the country's leading food distributors, where she is currently a Senior Vice President and has been President of the Manufacturing Division since 2011. Prior to US Foods, Ms. Wulf has held senior positions at Tyson Foods Inc, Sara Lee Corporation, and Bunge Corp., among others. Additionally, she is currently on the Board of Directors and the Executive Committee of the National Fisheries Institute. Her appointment has been planned to coincide with the Company's developing emphasis on the commercialization of AquAdvantage Salmon, as the majority of the required regulatory hurdles have been passed.

Dr. Ronald Stotish will remain with the Company as an Executive Director with responsibility for research and regulatory affairs. He will continue to work closely with the regulatory authorities involved in food and biotechnology in the United States, Canada, and other countries. He will also lead the continued technical development of new products and will work closely with Ms. Wulf in the planned expansion of the production organization both within North America and abroad.

According to Richard Clothier, Chairman of the Board of Directors, "We are delighted to appoint Sylvia Wulf as the Chief Executive Officer of AquaBounty. Her wide and deep experience in the food industry in North America and its fish sector will be a vital asset in the production and marketing of AquAdvantage Salmon and in the development of additional products. This appointment greatly strengthens AquaBounty's executive team at a crucial stage in the Company's development, and the Board looks forward to a period of rapid growth under Sylvia's leadership.

The Board would also like to take this opportunity to thank Dr. Stotish for the tireless work and effort he has put into successfully navigating the Company through the rigorous regulatory channels in the United States and Canada that culminated in approvals for AquAdvantage Salmon by both the U.S. Food and Drug Administration and Health Canada."

Sylvia Wulf added "AquAdvantage Salmon is the type of innovation necessary to meet the rising consumer demand for a healthy source of protein, and salmon in particular, without placing further pressure on the sea and coastal environments. I look forward to working with Dr. Stotish and the team to successfully commercialize it both in North America and abroad."

About AquAdvantage Salmon – AquAdvantage Salmon is an Atlantic salmon that has been bioengineered to grow to market size in about half the time of a traditional farmed Atlantic salmon. It significantly improves the economics of producing salmon in land-based contained facilities. AquAdvantage Salmon is a healthy, environmentally sustainable alternative to imported farmed Atlantic salmon.
