AquaBounty Technologies, Inc.

Results for the quarter and six months ended June 30, 2018

MAYNARD, Massachusetts, August 7, 2018 - AquaBounty Technologies, Inc. (NASDAQ: AQB) (“AquaBounty” or the “Company”), a biotechnology company focused on enhancing productivity in the aquaculture market and a majority-owned subsidiary of Intrexon Corporation (NYSE: XON), announces the Company’s financial results for the second quarter and six months ended June 30, 2018.

Financial and Operational Summary:

- Completed the second sale of AquAdvantage Salmon from our farm in Panama;
- stocked our Indiana farm with traditional Atlantic salmon eggs while waiting for approval from the U.S. Food and Drug Administration (“FDA”) to import AquAdvantage Salmon eggs;
- net loss for the six-month period ended June 30, 2018, increased to \$5.2 million from \$4.1 million in the corresponding period of the previous year, reflecting pre-production costs at the Indiana farm and R&D activities at the Rollo Bay hatchery; and
- cash and cash equivalents at June 30, 2018, were \$3.5 million (December 31, 2017: \$0.5 million).

Commencement of Operations in Indiana with Traditional Atlantic Salmon:

AquaBounty previously announced that it had received FDA approval to raise AquAdvantage Salmon at its land-based contained facility near Albany, Indiana. However, the Company is currently prevented from importing its AquAdvantage Salmon eggs from Canada due to the existence of an “Import Alert” pending the FDA’s issuance of final labelling guidance for the product. The Company has indicated that it is fully prepared to comply with labelling requirements for its product in order for this process to conclude in the near term. In the interim, the Company has stocked the Indiana farm with traditional Atlantic salmon eggs and has commenced grow-out activities.

Ronald Stotish, Chief Executive Officer of AquaBounty, stated: “In this quarter, we completed our second sale of AquAdvantage Salmon harvested from our Panama farm and stocked our Indiana farm with traditional Atlantic salmon eggs. This stocking has allowed us to start operations at the facility, while we wait for the lifting of the import alert on AquAdvantage Salmon, which we anticipate in the second half of the year.”

Dr. Stotish to Present at Investor Conference:

Ronald Stotish will be presenting at the 20th Annual Global Investment Conference in New York City, sponsored by H. C. Wainwright on September 4-6, 2018. A live webcast of the presentation will be available on the “Investor-Events” page of the Company’s website (www.aquabounty.com).

About AquAdvantage Salmon - AquAdvantage Salmon is an Atlantic salmon that has been bioengineered to grow to market size in about half the time of a traditional farmed Atlantic salmon. It improves the economics of producing salmon in land-based contained facilities. AquAdvantage Salmon is a healthy, environmentally sustainable alternative to imported farmed Atlantic salmon.
